

Ranit Kumar Manik

me@5dev.in • [LinkedIn](#) • [GitHub](#) • [LeetCode](#) • [Portfolio](#)

Experienced Full-Stack Developer skilled in building, deploying, and maintaining scalable web applications using Next.js, Node.js, and cloud-native technologies

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Go, Python
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, React Native, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, Docker, Kubernetes, Firebase, AWS, Vercel, Storybook, Figma
- **Databases & ORMs:** PostgreSQL, MongoDB, Mongoose, Prisma
- **Testing & CI/CD:** Jest, Playwright, Vitest, GitHub Actions
- **Concepts:** SaaS, UI/UX Design, REST & GraphQL APIs, Microservices, Design Systems
- **Problem Solving:** Solved 200+ DSA problems across LeetCode

EXPERIENCE

Frontend Engineer [Busiman](#) Remote (Jun 2024 - JAN 2026)

- Orchestrated the scaling of the core SaaS platform by architecting advanced GraphQL APIs and automating CI/CD pipelines with Playwright, reducing deployment errors and increasing release velocity.
- Engineered a high-performance internal UI library, optimizing component rendering for resource-constrained hardware and standardizing design patterns across the engineering team.
- **Tech Stack:** JavaScript, TypeScript, React, Next.js, Storybook, GraphQL, AWS, Jest, Playwright

PROJECTS

WebSandbox — Creator & Maintainer [Web Link](#) • [Demo Video](#)

- **Cloud IDE Architecture:** Architected a multi-tenant workspace platform within an Nx monorepo, powering a highly interactive frontend (Next.js 16, React 19, CodeMirror 6, Xterm.js) backed by a scalable Node.js/Express REST API.
- **Container Orchestration:** Provisioned secure, on-demand development environments by orchestrating Docker and Kubernetes to deploy isolated code-server instances, utilizing BullMQ for automated ephemeral resource cleanup.
- **Dynamic Proxy Routing:** Engineered a custom L7 proxy routing layer to seamlessly tunnel concurrent HTTP and WebSocket traffic directly into isolated containers via dynamic wildcard subdomains.
- **High-Concurrency Billing Engine:** Developed a transactionally safe, Stripe-integrated credit ledger utilizing PostgreSQL advisory locks (via Kysely) to eliminate race conditions during concurrent operations and accurately attribute container uptime.
- **Enterprise Security & DevOps:** Hardened API surfaces with Redis-backed rate limiting, strict CORS/CSRF policies, and Helmet; enforced quality gates through rigorous GitHub Actions CI/CD pipelines (Jest, Vitest) and telemetry (Prometheus/Grafana).

AWARDS & CERTIFICATIONS

- ❖ **Certification:** Finalist, Smart India Hackathon (SIH 2025) [Link](#) (2025)
- ❖ **1st Prize:** Departmental Coding Competition [Link](#) (2025)
- ❖ **1st Prize:** Web Arena, RESONANCE XIII, CEMK [Link](#) (2024)
- ❖ **Certification:** Frontend Developer Internship, Busiman [Link](#) (2024)

EDUCATION

College of Engineering & Management, Kolaghat (2022 - 2026)

Bachelor of Technology - Computer Science and Engineering | SGPA: 7.1/10.0

Relevant Coursework: C, Java, Python, DSA, OOPS, DAA, OS, CN, DBMS, Cloud Computing, Cybersecurity

LANGUAGES

English (Full Professional) | Hindi (Full Professional) | Bengali (Native)
