Software Engineer | Go • Python • JavaScript • Full-Stack Development

SKILLS

- **Languages:** Go, Python, JavaScript, TypeScript, SQL
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend:** Chi, Node.js, Express.js, REST APIs, GraphQL, WebSockets
- **Databases & ORM:** PostgreSQL, Redis, Prisma
- **Cloud & DevOps:** Docker, GitHub Actions, Vercel
- **AI Engineering:** LLM APIs, LangChain, Structured Outputs, RAG, Embeddings, Vector Search
- **Testing & Tools:** Git, Jest, Playwright, Storybook, Nx, n8n
- **Core CS:** DSA, OOP, DBMS, OS, Computer Networks, System Design

EXPERIENCE

Frontend Engineer (Busiman)

Remote (Jun 2024 - JAN 2026)

- **Tech Stack:** React, Next.js, TypeScript, GraphQL, Apollo Client, Tailwind CSS, SSE, Playwright, Storybook
- Built and maintained an in-house React UI library, replacing third-party UI dependencies to improve consistency, maintainability, and performance across the product, particularly on low-end devices.
- Developed and optimized core frontend workflows across the SaaS platform, with a focus on responsive interfaces, large-data handling, offline support, and reusable architecture.
- Improved frontend reliability through automated testing and resilient client-side workflows, including background processing and real-time job updates.

PROJECTS

Scoutly — AI-Powered Job Discovery & Career Automation Platform

scoutly.in

- **Tech Stack:** Go, Python, PostgreSQL, Redis, Next.js, TypeScript, Docker, Azure, LangChain, Sentry
- Built and deployed a full-stack job discovery platform that aggregates and normalizes thousands of job postings from multiple job boards and ATS platforms.
- Developed a Go backend and Python data-ingestion pipeline with PostgreSQL and Redis for job processing, search, caching, and user-specific job recommendations.
- Built a hybrid job-matching system combining candidate skills, role, location, job freshness, and semantic similarity to rank relevant opportunities.
- Integrated LLM-powered career automation for job-description analysis, tailored resumes, cover letters, and application responses, with asynchronous processing and versioned outputs.

WebSandbox — Browser-Based Cloud IDE

websandbox.online

- **Tech Stack:** Next.js, React, Node.js, Docker, PostgreSQL, Redis, GitHub Actions, Prometheus, Grafana
- Built a browser-based cloud IDE with isolated workspaces and live code execution using Next.js, React, and Node.js.
- Provisioned isolated development environments with Docker and built a proxy layer for routing traffic to individual workspace containers.
- Implemented Redis rate limiting, PostgreSQL-based billing, GitHub Actions CI/CD, and Prometheus/Grafana monitoring.

AWARDS & CERTIFICATIONS

- ❖ **Finalist:** Smart India Hackathon (SIH 2025) (2025)
- ❖ **1st Prize:** Departmental Coding Competition (2025)
- ❖ **1st Prize:** Web Arena, RESONANCE XIII, CEMK (2024)

EDUCATION

College of Engineering & Management, Kolaghat

(2022 - 2026)

Bachelor of Technology - Computer Science and Engineering | SGPA: 7.46/10.00
