

Ranit Kumar Manik

[me@5dev.in](#) • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Experienced Full-Stack Developer skilled in building, deploying, and maintaining scalable web applications using Next.js, Node.js, and cloud-native technologies

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Go, Python
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, React Native, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, Docker, Kubernetes, Firebase, AWS, Vercel, Storybook, Figma
- **Databases & ORMs:** PostgreSQL, MongoDB, Mongoose, Prisma
- **Testing & CI/CD:** Jest, Playwright, Vitest, GitHub Actions
- **Concepts:** SaaS, UI/UX Design, REST & GraphQL APIs, Microservices, Design Systems

EXPERIENCE

Frontend Engineer [Busiman](#) Remote (Jun 2024 - JAN 2026)

- Orchestrated the scaling of the core SaaS platform by architecting advanced GraphQL APIs and automating CI/CD pipelines with Playwright, reducing deployment errors and increasing release velocity.
- Engineered a high-performance internal UI library, optimizing component rendering for resource-constrained hardware and standardizing design patterns across the engineering team.
- **Tech Stack:** JavaScript, TypeScript, React, Next.js, Storybook, GraphQL, AWS, Jest, Playwright

PROJECTS

WebSandbox — Creator & Maintainer [Web Link](#) • [GitHub Link](#)

- Developed a Cloud IDE Platform: Engineered an enterprise-grade, multi-tenant workspace platform (similar to CodeSandbox) using an Nx Monorepo, Next.js 15, and Node.js (Express).
- Orchestrated Containerized Infrastructure: Leveraged Docker and Kubernetes to provision isolated, on-demand development environments (code-server), implementing background jobs for ephemeral container cleanup.
- Engineered Dynamic Proxy Routing: Built a custom routing layer to handle seamless HTTP and WebSocket proxying into isolated containers via dynamic subdomains.
- Built Transactional Billing Engine: Implemented a robust credit management service utilizing PostgreSQL advisory locks to prevent race conditions during high-concurrency operations and accurately track container uptime.
- Enforced Enterprise Security: Hardened the API with strict CORS strategies, CSRF protection, and Redis-backed rate limiting, backed by comprehensive CI/CD pipelines (Jest, Vitest, GitHub Actions).

AWARDS & CERTIFICATIONS

- ❖ **Certification:** Finalist, Smart India Hackathon (SIH 2025) [Link](#) (2025)
- ❖ **1st Prize:** Departmental Coding Competition [Link](#) (2025)
- ❖ **1st Prize:** Web Arena, RESONANCE XIII, CEMK [Link](#) (2024)
- ❖ **Certification:** Frontend Developer Internship, Busiman [Link](#) (2024)

EDUCATION

College of Engineering & Management, Kolaghat (2022 - 2026)

Bachelor of Technology - Computer Science and Engineering | SGPA: 7.1/10.0

Relevant Coursework: C, Java, Python, DSA, OOPS, Design and Analysis of Algorithms, Operating Systems, Computer Networks, Cloud Computing, Database Management Systems, Cybersecurity

LANGUAGES

English (Full Professional) | **Hindi** (Full Professional) | **Bengali** (Native)
